

Nature meets design. The "Metamorphosis" is about the elegance of high-end tailoring and the aesthetic of nature.

The design intention of the Metamorphosis Bed is to radiate a calm, yet strong appearance. It can be placed in front of the wall or the centre of the room.

The headboard inspired by the special shapes of the Fungi embraces the bed frame. Drapé which is the process of transforming a fabric or leather into a three-dimensional form, applied to inside of headboard. The saddle-leather surface continues through the area behind the bed and the bed frame.

The invisible side tables on both sides are made of wood. A special place for all those essentials. – Bedside books, jewellery and accessories.
