

The bed RANA is designed to be in harmony with its surrounding landscape, a feeling of extending the room so as to become one with the outside.

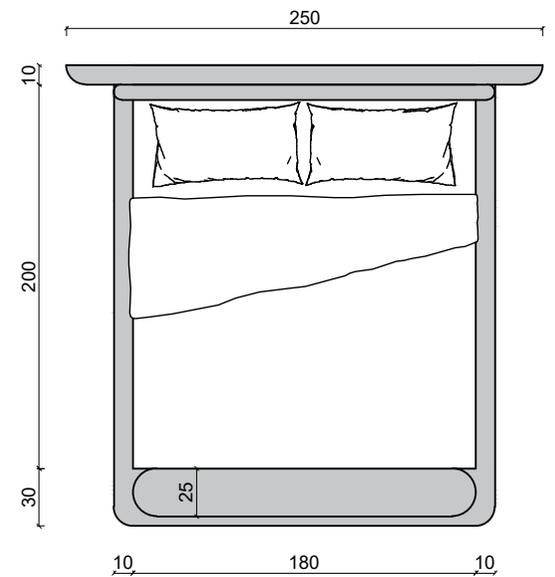

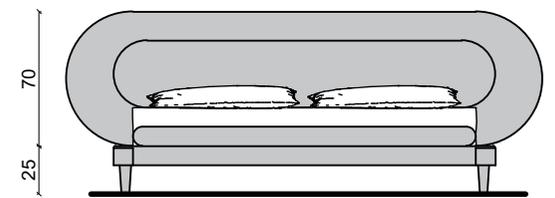

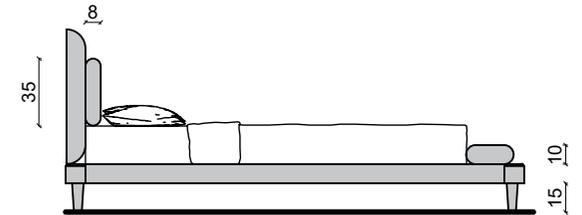

The overhanging headboard makes it possible to accommodate and ideally integrate a bedside table. By extending the end of the bed, makes it possible to provide a seat like a bench with its cushion.

The frame and the headboard are in green wool. The black metal base is designed as an important visual element in harmony with the shapes and colors of the bed. Both cushions are designed with curved shapes in black corduroy for a soft and comfortable feel.

RANA
A574

- 1 - Black corduroy cushion
- 2 - Green woolen fabric
- 3 - Black metal base
