

H Bedding System

Concept:

The H bed concept is a unique item of furniture created to be placed centrally on the bedroom, enhancing the architecture of our homes. This bed communicates appetite and passion for high-couture finishing and traditional craftsmanship, as well as the willingness to bring back the solemnity that this furniture used to have on people's living spaces.

Every component of the bed has been developed with the aim of enhancing the greatest Elite's craftsmanship and technological capabilities (fine upholstery, leatherwork, cabinetmaking, wooden bed base with raised edges, WoodenBoxpring).

Use & experience:

Its horizontality and low base provides a comfortable and unique resting experience, highlighting the open space of the room.

The vertical structure connects the ceiling with the bed base, its height can be customized to be adapted to architecture requirements and serves as a room divider. This double use empowers users to choose between different bedroom distributions based on their particular needs and expectations. The pendant effect of the headboard, combined with the slender structure and the horizontal base, emphasizes the lightness of the designed concept.

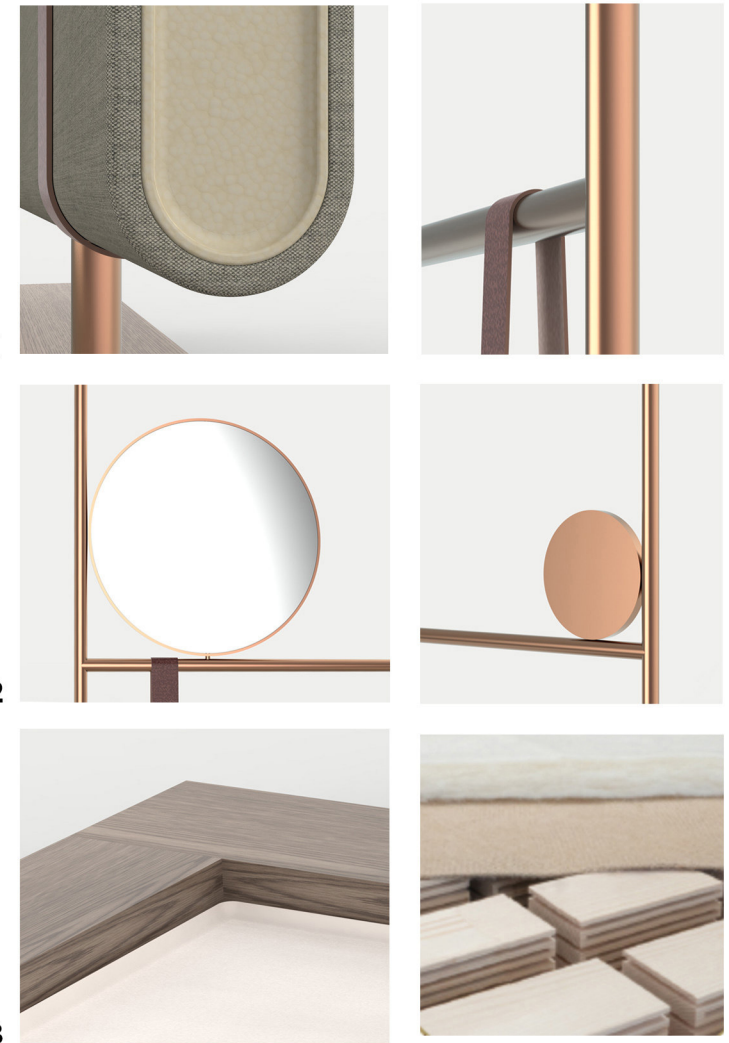

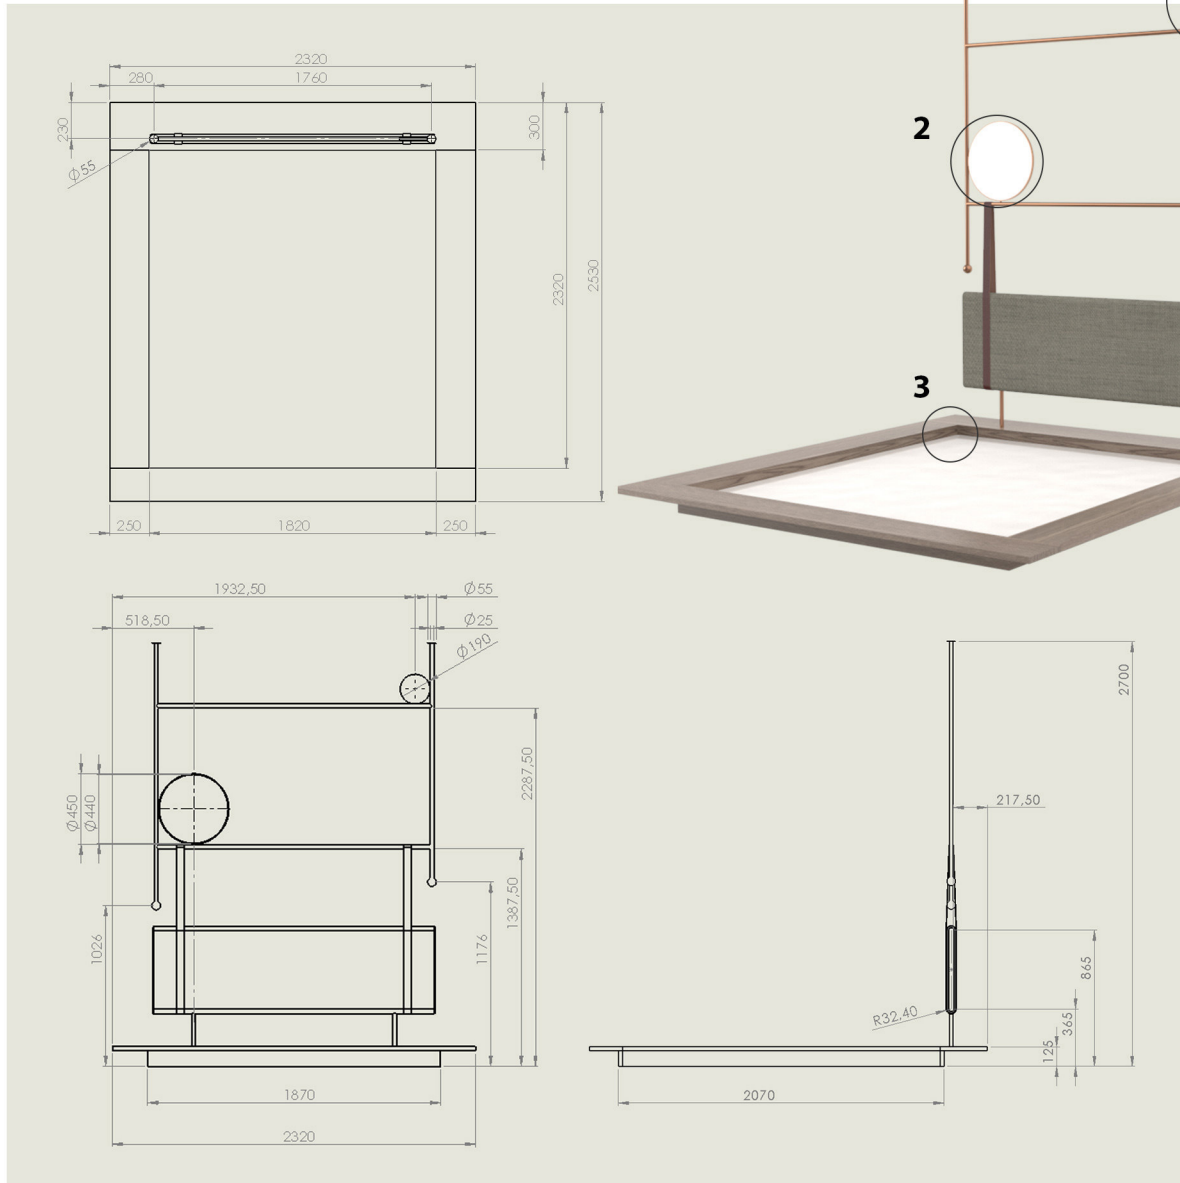

Environment considerations:

Its haute-couture inspired design results in a great match with excellent architectural spaces. The H bed is characterized by pure, minimal lines and combines fine materials such as bronzed metal, mirrors, swiss wool, leather, and bleached oak.

The H Bed design is committed with high-end design, enhancing today's lifestyles, looking for innovation in beds' aesthetics and usage, and providing a better resting experience as well as durability in the living spaces.

Registration number E415.

H Bedding System

- 1.** Upholstery: Grey and clear beige Swiss wool, natural brown leather & natural finished suede. Headboard's pendant effect.
- 2.** Architectural elements. Room divider structure. Rotating mirror.
